		195' to 204'	8.5'
		Over 204'	*
*To be determined by GHQ Bridge			

NOTES: Depth includes slab & haunch.
 Crown and superelevation must be added to the depths listed.
 All superstructure depths are approximate.
 Span lengths for plate girders are based on a three span structure. If a two span structure is desired, add 6 in. to the structure depth.
 An additional 2" of structure depth is necessary when using prestressed concrete girders on a sag vertical curve.
